Acta Scientiarum Mathematicarum
Volume 60, Numbers 1-4, 1995

Contents

V. TOTIK, A tribute to Károly Tandori and László Leindler 7–30

R. AULASKARI, G. CSORDAS, Besov spaces and the $Q_{q,0}$ classes 31–48

S. BARON, E. LIFLYAND, Complementary spaces and multipliers for Fourier transforms 49–57

P. L. BUTZER, R. L. STENS, An extension of Kramer's sampling theorem for not necessarily "bandlimited" signals — the aliasing error 59–69

A. CARBERY, A. SEEGER, Multiparameter Calderón–Zygmund theory and interpolation of analytic families 71–97

Z. CIESIELSKI, A. KAMONT, Lévy's fractional Brownian random field and function spaces 99–118

K. CORRÁDI, On the direct product of cyclic subsets 119–129

G. CRISCUOLO, G. MASTROIANNI, Fourier and Lagrange operators in some weighted Sobolev-type spaces 131–148

E. CSÁKI, M. CSÖRGŐ, QI-MAN SHAO, Moduli of continuity for ℓ^p-valued Gaussian processes 149–175

S. CSÖRGŐ, J. MIELNICZUK, Close short-range dependent sums and regression estimation 177–196

G. CZÉDLI, GY. POLLÁK, When do coalitions form a lattice? 197–206

G. CZÉDLI, L. SZABÓ, Quasiorders of lattices versus pairs of congruences 207–211

J. DEMETROVICS, GY. O. H. KATONA, A. SALI, Minimal representations of branching dependencies 213–223

Z. DITZIAN, Multidimensional Jacobi-type Bernstein–Durrmeyer operators 225–243

K. DRIVER, H. STAHL, Simultaneous rational approximants to Nikishin-systems. I 245–263

K.-H. FÖRSTER, B. NAGY, Local spectra and the Riemann localization principle 265–276

S. FRIDLI, F. SCHIPP, Strong summability and Sidon type inequalities 277–289

Contents

G. Gasper, Walter Trebels, Ultraspherical multipliers revisited ... 291–309

G. Gát, Pointwise convergence of Fejér means on compact totally disconnected groups ... 311–319

F. Gécseg, B. Imreh, On the cube-product of nondeterministic automata ... 321–327

Dăng Vũ Giang, F. Móricz, Lebesgue integrability of Fourier transforms ... 329–343

E. Gombay, L. Horváth, An application of U-statistics to change-point analysis ... 345–357

J. Gróf, Linear combinations of Szász–Mirakjan type operators ... 359–369

L. Hatvani, T. Krisztin, Asymptotic stability for a differential-difference equation containing terms with and without a delay ... 371–384

L. Imhof, R. J. Nessel, On the sharpness almost everywhere of equivalence assertions for positive linear operators ... 385–409

K.-H. Indlekofer, A. Járai, I. Kátai, On some properties of attractors generated by iterated function systems ... 411–427

I. Joó, V. E. S. Szabó, A generalization of Pál interpolation process . 429–438

L. Kérchy, On roots of normal operators ... 439–449

V. Komornik, Well-posedness and decay estimates for a Petrovsky system by a semigroup approach ... 451–466

A. Kroó, J. Szabados, Approximation by lacunary Bernstein and self-reciprocal polynomials ... 467–486

Á. Kurusa, Romanov's theorem in higher dimensions ... 487–493

L. Leindler, On equivalence of coefficient conditions with applications 495–514

W. Lenski, On the generalization of strong summability of double Fourier series ... 515–526

D. S. Lubinsky, Converse quadrature sum inequalities for polynomials with Freud weights ... 527–557

E. Malkowsky, A study of the α-duals for $w_\infty(p)$ and $w_0(p)$ ... 559–570

J. Németh, A further note concerning Hardy–Littlewood classical inequalities ... 571–579

S. M. Nikol'skii, Bernstein inequality for algebraic polynomials on manifolds described by trigonometric polynomials ... 581–588

S. Gy. Révész, Minimization of maxima of nonnegative and positive definite cosine polynomials with prescribed first coefficients ... 589–608

H. Schwinn, On strong approximation of orthogonal series ... 609–618

Contents

L. L. STACHÓ, On the structure of inner derivations in partial Jordan-triple algebras 619–636

I. SZALAY , N. TANOVIĆ-MILLER, The duals of A^p and S^p the spaces of absolutely and strongly convergent Fourier series of index $p > 1$ 637–657

Á. SZENDREI, Expansions of minimal varieties 659–679

L. A. SZÉKELY, Brouwer's fixed point theorem implies Gallai's theorem 681–684

J. TATEOKA, W. R. WADE, On the strong approximation and summability by Cesàro means on the Besov spaces over the 2-series field ... 685–703

J. TERJÉKI, Representation of the solutions to linear pantograph equations 705–713

V. TOTIK, Markoff constants for Cantor sets 715–734

A. K. VARMA, Some inequalities of trigonometric polynomials having all zeros inside $[0, 2\pi)$ 735–746

P. VÉRTESI, Convergence order for ρ-normal matrices 747–760

L. VIHAROS, Limit theorems for linear combinations of extreme values with applications to inference about the tail of a distribution 761–777

F. WEISZ, Strong summability of two-dimensional Walsh–Fourier series 779–803

Book Reviews 805–821
